

Notching Saw AS-U 450

Universal notching saw for aluminum structure construction

Technical data:

- AC brake motor: 400 V, 3 kW
- Air pressure (bar): 6
- Speed (U/min): 2800
- Notching cutting height (mm): 153
- Notching width (mm): 128
- Notching width (mm): 250
- Infeed: manual
- Weight (kg): approx. 540

Characteristic features:

- The two saw motors are individually switchable
- Sawdust and material sections are conducted in the Machine stand led
- The standard equipment of the machine are Saw blade spraying for both units
- Profile abutment shoulder can be the way to peaks Setting angles
- With two independently arranged sawing units, the diverse notches can be carried out on the profile rod end
- Both saw blades can be via a worm gear with handwheel in the range of $+ / -45^\circ$ swiveled
- The material table can be adjusted via column guides in height, as well as in depth
- precision ball bearing guide of the tool sled on hardened and ground steel shafts
